

# Take Your Legislator for a Ride!

Our industry suffers from a great lack of understanding and that's why we encourage you to **Take Your Legislator for a Ride!**

- Explain your operation and what you do
- Share some of the challenges you face as a truck operator.
- Tour the terminal, get in a truck, and if possible - go for a ride!
- Take pictures and share them with SCTA!

These visits provide legislators with an up-close perspective of how the trucking industry works as they walk through your facilities, interact with employees from different departments, and discuss the challenges and opportunities facing your business.

Allow them to hop up in the truck to learn about the technologies employed in and on a vehicle. When possible, you are encouraged to pair the legislator with a driver for a ride-along to help them get a better appreciation for what a driver experiences daily!

Inviting your legislators to do this can go a long way towards showing our elected policy makers how and what we do. Not to mention, you will get a great deal of satisfaction out of the experience and so will they!
